

# Research boats Toivo 1 and Tieto 1

Catamaran hull boats are designed for safe operation and research use in lakes, rivers, and coastal waters.

Our service offers comprehensive support for various research endeavors, specializing in vegetation and bathymetric mapping through advanced navigation systems.

**Research:** model calibration, microplastics analysis, water quality and quantity assessments, sediment sampling, underwater imaging, and precise vegetation mapping

**Service Options:** Rental Service: Daily rentals starting at €100/day. Comprehensive Service: Includes the boat system and an experienced captain, starting at €1000/day.
