Nordic Swan Ecolabel, Circular Economy and Product Environmental Footprint (SCEPEF)

Objectives:

- Compare the Nordic Swan eco-label and PEF/OEF methodologies
- Clear out relations between the Nordic Swan and circular economy
- Find out about company perspectives to eco-design and PEF
- Analyse the possible use of LCA and PEF in policies

Outputs:

- 6 reports
- Report Product Environmental Information and Product Policies published 18 November
- Available: <http://www.syke.fi/projects/scepef>

PEF information: Possibilities for Type I eco-labels

I. USE READILY AVAILABLE PEF INFORMATION

PEFCRs and other readily available related material are used in defining which criteria to set.

II. CREATE PEF INFORMATION

PEF studies are carried out in setting criteria and given as an option to license-applicants to get points

III. REQUIRE PEF INFORMATION

Criteria are PEF-based and a PEF study is required from companies.
