1) PanBothnia, seeks to collect information on needs, known issues, and existing conditions, both cross-border and not, that are currently relevant and possibly future one. **Coast to Coast**, aims to define which of the needs and issues can benefit or be solved cross-border interregionally/nationally/internationally.

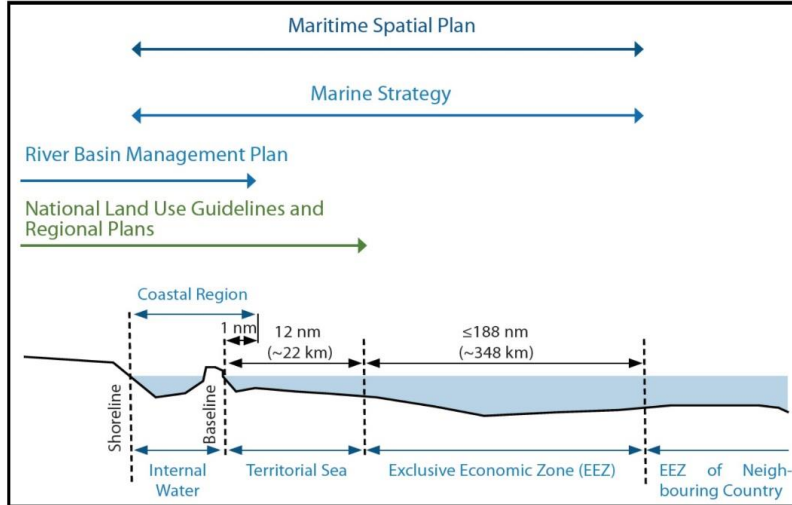

2) Stakeholder collision to support collaboration addresses a new constellation of actors and power relations in open interactive communication platforms to cultivate constructive participatory premises in MSP

Public meeting 2

When fishing and Energy meet in the Gulf of Bothnia

What can we learn from previous/current MSP projects?

Exploring possible futures with a focus on energy and fishing

Tools that were used:

-  The traffic-light method
-  The Baltic Explorer
-  Inspirational presentations and Panel discussions
-  World Café
-  Mentimeter

Fishers and OWF needs

Co-existing – is it possible?

Communication directly between sectors – initiated!

 **Collaboration possibilities**

 **Conflict solutions**

 **Need for the same space – or not?**

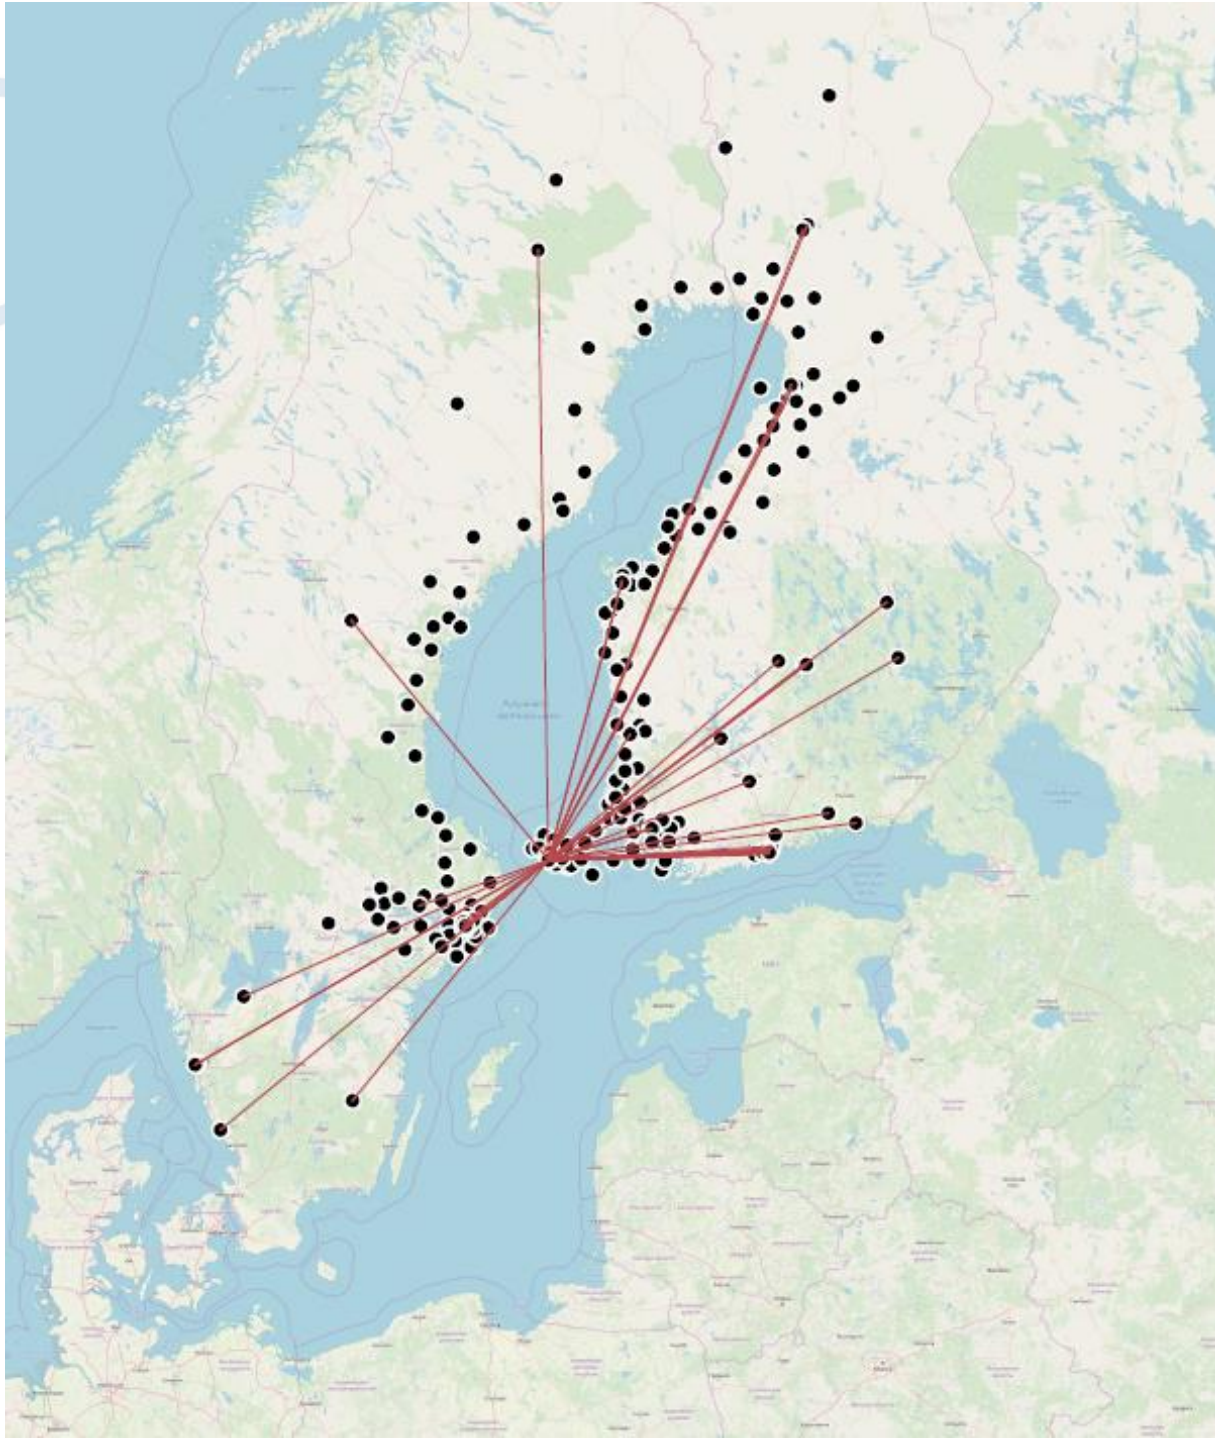

Did they attend the meeting?

◆ Yes

● No

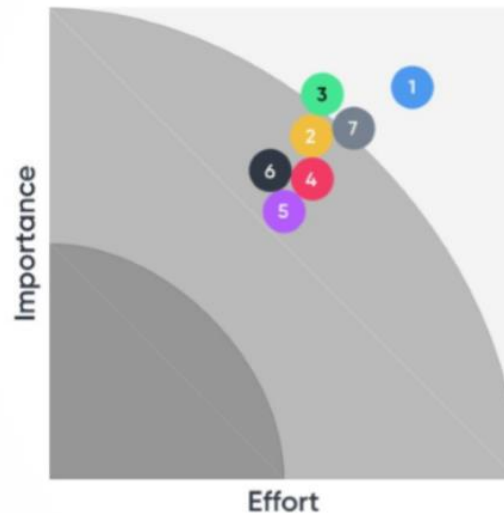

What is most important for MSP in the Gulf of Bothnia? Max 3 things

17

What is the best way for improving MSP?

- 1 Stakeholder involvement
- 2 More, better, detailed data
- 3 Sharing data
- 4 Map tool: Visualisation
- 5 Map tool: Analysis
- 6 Illustrating: Videos, infographics
- 7 Research

border
meeting

17-18th
September
2019

UCPori
Pohjoisranta 11 A
Pori, FINLAND

When planners meet, in the Gulf of Bothnia

Better maritime planning –
towards a shared future, together

17th of September: 9:00-17:00

18th of September: 9:00-13:00

Excursion (voluntary) Aquaculture/Off-shore Wind

18th of September 13:00-17:00

Themes:

- **Building Networks**
Cross border and cross level
- **Stakeholder Involvement**
Why? How? When?
- **Lessons from FIA XSE**
Results and recommendations

For

- Local-, regional-, and national-level spatial planner
- Finland, Sweden, and Åland
